

## NEXT GEN PEN PAL

100 For All would like to partner with Success Academy for our Next Gen Pen Pal program. Our program provides SA scholars with curriculum about the world's water crisis and connects your scholars with scholars in Indonesia through our video pen pal program. Through our curriculum SA scholars will learn the impacts of clean water domestically and abroad, what changes in their daily lives they can make to help the cause, and how to fundraise towards clean water solutions for their new pen pals in Indonesia. We will work with your school to develop a competitive fundraising program that incentivizes students by allowing winning scholars the chance to chat with an Indonesian student, learning more about their culture and sharing ours. We are firm believers that awareness stems from education and through this educational program we can instill awareness of the world's largest killer and be part of the solution in our own unique way.

## WHO IS 100 FOR ALL?

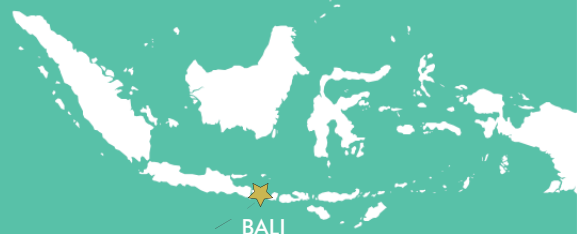

We are a NYC based 501(c)3 non profit working to bring clean water solutions and awareness around the globe. In under a year of operating, we have aided in the rebuilding of the Langtang Valley village in Nepal as well as provided sustainable clean water solutions to communities throughout Nicaragua and Bali. Our goal for the Next Gen Pen Pal program is to connect students from different walks of life and provide clean water, opportunity and education. Through education, we are able to teach our scholars about the water crisis, which is the largest preventable killer for children in developing countries. From education, we are able to inspire a generation to apply their interests and academics to make the world a better place. For more information, visit us at [100forall.org](http://100forall.org).

## WHO IS SOCIAL IMPAKT?

Social Impakt is a social enterprise based in Bali, Indonesia whose mission is to bring simple, eco-friendly and life-changing technologies like water filters to rural Indonesia. The social enterprise also aims at creating micro-business opportunities and therefore has set up a network of 30 water filter resellers in Bali.

Social Impakt has already positively impacted more than 20,000 lives with improved access to clean water. The filter improves health and income and reduces the use of plastic bottles which are littered around in Indonesia. It also reduces CO<sub>2</sub> emissions and deforestation : gas and wood are used to boil water in the villages to make it drinkable. With their action, they have already saved 9,000 tonnes of CO<sub>2</sub> equivalent emissions over the last three and a half years. "

Your Scholar

# CLEAN WATER X EDUCATION = OPPORTUNITY

### Our Research

- 443 million school days are missed due to contaminated water illnesses
- 760,000 children die from diarrheal diseases each year
- Safe water for scholars provides opportunity starting from the classroom
- Less time spent fetching water means more time in the classroom
- With girls assigned the family duties of fetching water, our filter empowers girls by restoring educational opportunity
- Make a friend across the world!

### Our Impact

- Our candle filters are up to 9 times cheaper than buying purified water in the gallon, 4 times cheaper than boiling water
- With less than .04 micron pores our filters stops micro-organisms, bacteria, cyst, parasites, fungi and other particles in the water collected from the tap, well, river or rain
- Reduces the use of wood or gas to boil water, which in turn reduces deforestation and CO<sub>2</sub> emissions when burning wood or gas for boiling water

### The Financials

- 100% of donations raised by scholars goes to clean water solutions to scholars in need
- Competitive fundraising incorporating SA academics (ex: math, geography...)
- For every dollar invested in clean water solutions there are \$4 of economic return through educational opportunities

## TOGETHER WE CAN BRING...

### Education

### Clean Water

### Awareness

### Culture

TO OUR STUDENTS.
